

Oratrices et orateurs invités

Isabelle Dixon, LCPQ, Toulouse
Counterion effects in photocatalysis
insights from DFT

Sami Lakhdar, LHFA, Toulouse
Phosphorus Chemistry Under Visible Light:
Opportunities and Challenges

Joao Lima, Université de Lisbonne, Portugal
Gold(I) luminescent complexes and supramolecular
assemblies

Isabelle Malfant, LCC, Toulouse
Nitric oxide photo delivery
from ruthenium nitrosyl complexes

Cassandre Quinton, ISCR, Rennes
Photophysical properties of linear and
cyclic oligocarbazoles: impact of the curvature

Laurent Rubatat, IPREM, Pau
Photo-Polymerization Induced Microphase Separation:
From 3D Printing to Solid Polymer Electrolyte Applications
